Professional Summary

Computer Science undergraduate with hands-on experience in SQL querying, Python-based data analysis, and dashboard reporting using Excel and Power BI. Built and deployed full-stack and ML-driven applications involving data extraction, cleaning, and visualization. Skilled at translating raw, unstructured data into structured insights, with proven leadership in technical and team environments.

Education

East Point College of Engineering and Technology	2022 – 2026
Bachelor of Engineering in Computer Science	Bangalore, India
Vijaya Integrated PU College	2020 – 2022
PUC – Science Stream	Bangalore, India

Technical Skills

Programming & Querying: Python (Advanced), SQL (oracle SQL, PostgreSQL), JavaScript
Data Analysis & Visualization: Excel, Power BI, Pandas, Matplot, seaborn, NumPy, Data Cleaning, Data Visualization, Reporting
Databases: Oracle SQL, PostgreSQL
Tools & Platforms: Git, GitHub, Postman, VS Code

Projects

AI Personal Finance Assistant *Python, FastAPI, ML, PostgreSQL, React*
– Built a Python ML microservice to automatically categorize expenses and predict future spending trends from transaction data.
– Designed and queried a PostgreSQL database schema to store and analyze structured financial records.
– Developed a full-stack dashboard to visualize spending patterns, helping users identify savings opportunities.

AI-Powered Health & Medication System *Python, FastAPI, OCR, MongoDB, React*
– Engineered a Python OCR pipeline (FastAPI) to extract structured medicine data from unstructured prescription images.
– Designed a MongoDB schema to store extracted records and trigger automated medication reminders.
– Cleaned and validated extracted text data to improve downstream data reliability.

Blockchain Transparent Donation Platform *React, Node, PostgreSQL, Cardano, IPFS*
– Built NGO-facing dashboards to report and visualize donation data with blockchain-verified transaction records.
– Queried and structured donor and transaction data in PostgreSQL to support transparent reporting.
– Implemented an IPFS-based proof-upload system to maintain auditable, structured records.

Leadership & Activities

- **Trek Lead, Sahyadri Sanchari** – Planned and led outdoor expeditions, managing logistics and team coordination.
- **Freelance Developer- Karate Academy** – Managed client requirements end-to-end and delivered a complete website.

Certifications

- Full-Stack Web Development Bootcamp – Udemy (61.5 hours)
- HackerRank Python (Basic) – Certified

Achievements

- Selected Participant – Cardano Hackathon Asia 2025
